

Lithium Battery Charger

MCHEB-6015A-LFP

Features :

- Charging process protection short circuit prevention
- Intelligent soft start battery and charger protection
- Intelligent temperature control Improve charging efficiency
- Low temperature working increase service use time
- Reverse connect protection protective integral circuit
- Automatic power-off remove hidden dangers

| | |
|------------------------|-----------|
| Input Voltage | 160-240V |
| output voltage | 68.4V |
| Rated Frequency | 47-63 Hz |
| Charger Current | 15A |
| Efficiency | >90% |
| Case Material | Aluminium |
| With LCD | YES |
| Battery Type | Lithium |
| Cell type | LiFePO4 |
| Input Weight | 1.31Kg |

This charger is only designed for this battery model "MLEB LFP18-60", do not use for any other battery.
