

Lithium Battery Charger

MCHEB-6010A-NMC

Features :

- Charging process protection short circuit prevention
- Intelligent soft start battery and charger protection
- Intelligent temperature control Improve charging efficiency
- Low temperature working increase service use time
- Reverse connect protection protective integral circuit
- Automatic power-off remove hidden dangers

Input Voltage	160-240V
output voltage	67.2V
Rated Frequency	47-63 Hz
Charger Current	10A
Efficiency	>90%
Case Material	Aluminium
With LCD	YES
Battery Type	Lithium
Cell type	NMC
Input Weight	1.03Kg

This charger is only designed for this battery model "MLEB NMC20-60", do not use for any other battery.
